

BUILD OUT YOUR PACBIO WORKFLOW

Now available for PacBio® customers, our most recommended equipment

Set your new HiFi workflow up for success with our most trusted QC tool.

PacBio Revio® system

Accurate long-read sequencing

- Low cost per genome with scalable throughput
- Multiomic insights with methylation detection on every run
- More complete and phased genomes
- Industry-leading comprehensive variant detection

Learn more: [Revio system brochure](#)

Agilent Femto Pulse system

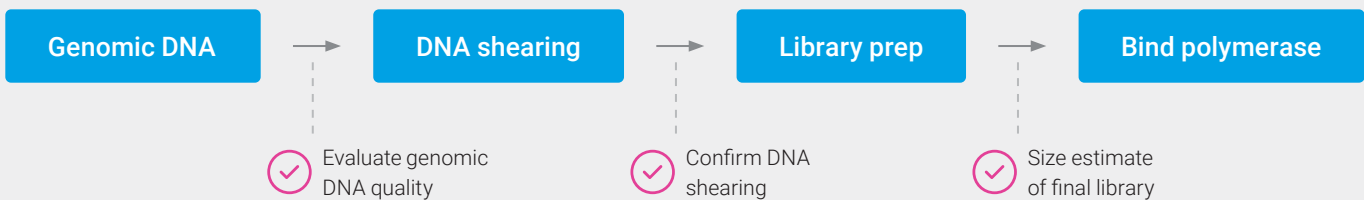

QC genomic DNA and libraries

- High-precision quality control with femtogram level sensitivity
- Flexible sample capacity
- Qualified by PacBio for HiFi library preparation including high-molecular weight gDNA analysis up to 165kb
